

PACKING SHIMS

SMALL 98 x 87mm

The features of our **98x87mm PACKING SHIMS**

Designed for packing underneath concrete precast or tilt-up panels in the industrial, commercial and civil construction industries, for levelling and packing objects with a high load mass.

Colour coded by thickness for ease of selection. Castle packing shims are manufactured from quality, plastic and tested with compressive loads up to 20 tonnes.

The shims feature a gripped non-skid surface at a handy 98 x 87mm.

Tip:

See also Castle 150x100mm shims for a larger colour coded shim system.
