

# LOCK CAP SAFETY CAP

FIXING TIE HOLE

SELF-LOCKING TABS

## The design specifics of our **Lock Cap Safety Cap**.

Used with Reo bar 12-32mm and Star-posts or waratahs the cap is high visibility yellow and features holes to allow tie on to star-post with internal flaps that hold on to deformed or straight steel ends. It is an alternative to our classic Safety Cap and is manufactured from strong robust plastic. It will not fall off due to its strong self-locking tabs.

Steel reinforcing bars, or rebar, are a common hazard on construction sites. The thin steel bars can stick out from construction projects and pose a hazard to workers who can cut or scratch themselves on the sharp ends. Workers that stumble or fall onto the exposed steel bars can be pierced or impaled on them, resulting in serious internal injuries and death.

Designed with smooth rounded cap, the Castle Lock Cap Safety Cap minimises damage or impalement injury in workplace accidents.

## APPLICATIONS

- Reo Bar end protection
- Star-Post or waratah protection.

## TECHNICAL CHARACTERISTICS

Code	LCY
Suits Bar Sizes	40mm
Dimensions	50x67x65mm
Colour	High Visibility Yellow
Bag Quantity	5000 units
Bag Weight	2.4kg
Pallet Quantity	9000 units
Pallet Weight	153kg
Pallet Cubic Area (m <sup>3</sup> )	2.2m <sup>3</sup>

## TECHNICAL DIMENSIONS

## FEATURES AND BENEFITS

- Flexible acceptance of 12-32mm bar.
- Fixing holes
- Safe rounded top.

## EVERYDAY APPLICATION

- Punch Cap onto Reo end for self-hold.
- Place on Star-Post and tie on.
